🐦 stevenspeaktech in stevenleelawson/ 🔄 stevenleelawson

Results driven, analytical, and enthusiastic professional with significant experience in software design, planning, development, implementation, and maintenance. Strong background in JavaScript (es6), React/Redux/Hooks, Vue.js/Vuex, SCSS (Responsive Designs), CSS3, and HTML5. Proficient in operational and unit testing. Adept at creating scalable, and efficient front-end applications that will drive optimal results for the team. Accustomed in working under extreme pressure and meeting critical deadlines in fast-paced startups. Highly adaptable with proven collaborative approach in working with cross-functional teams.

### Digital Turbine

#### Senior Frontend Web/UI Developer

Jan. 2023 to Current

- Implement designs for new components in internal UI library using Vue.js, SCSS, and Storybook
- Work with external contractors to craft requirements for consolidated OneAdmin portal and bring knowledge "in-house" to company
- Upgrade multiple micro-frontend repos (MFEs) with Vue 3
- Worked closely with UX/UI designers to implement visually appealing and user-friendly interfaces
- Present new technologies to in-house Web Developers Guild, confer best strategies with other frontend developers throughout the company
- Provide technical advice on bugs and enhancements
- Monitor the performance of the software; propose modifications and enhancements as necessary

### Cutover

#### Frontend Software Developer

London, England (Remote)

Mar. 2022 to Aug. 2022

- Involved in converting legacy AngularJS code to modern React patterns (React Hooks, Functional Components Architecture)
- Install and maintain UI libraries
- Identify and fix bugs throughout the app
- Engage in security training, update skills and professional development
- Work with product manager and squad to implement new features desired by high-profile customers in the financial sector

### Health Sqyre

#### Mid-Senior Frontend Developer

Denver, Colorado (Remote)

Apr. 2020 to Feb. 2022

- Used Vue.js to implement new features desired by users and product manager
- Owner and primary developer for the Admin Portal app; responsible for implementing new features, maintenance and deploying to production
- Contributor and feature developer to all microservice front end apps including the storefront, Customer Portal, and Vendor Portal
- Have captained releases for all codebases for deploys to production
- Troubleshooted and identified bugs in python backend code affecting the front end apps I am responsible for
- Worked and collaborated with UI designer to implement better, fresh designs for all front end apps for ideal User Experience
- Engage in mentorship and pair-programming with junior front end developers

### Ria Digital

#### Web Developer

Denver, CO

Dec. 2019 to Mar. 2020

- Fix bugs in a large scale application in production in React/Redux
- Build latest version of the website in Angular 8
- Completed proof-of-concept of the Ria Calculator in Vue.js
- Work with other front end developers to implement designs from product owners

### The Integer Group (Contract)

#### UI Developer

Lakewood, CO

Sept. 2019 to Nov. 2019

- Layout and execute architecture of app in a modular way, consistent with React best practices
- Used React hooks for state instead of using Redux to keep codebase minimal and lean
- Configured and deployed to multiple environments with AWS s3 buckets
- Wrote code to make the app completely responsive for all phones in mobile application
- Integrated AR technology for fun and interesting user experience
- Constantly updated codebase to be pixel-perfect with specifications and revisions with client meetings

### Business Alliance Financial Services

#### Frontend Software Engineer

Ruston, LA

July 2018 to Sept. 2019

- Execute front-end architecture
- Build a financial service application in React, Redux, and Python
- Collaborate with the team to determine operational specifications and create software requirements
- Troubleshoot design issues and fix bugs
- Write code for unit testing
- Create and maintain front-end standard documents

### Turing School of Software & Design

#### Frontend Curriculum

Nov. 2017 to June 2018

I enrolled at Turing to further deepen my knowledge of JavaScript and software developer, specifically with a focus of learning React to make engaging experiences for the user. Intensive 7 month program.

### University of Colorado at Denver

#### BS Music 2014

Bachelor of Science in Music with an Emphasis on the Recording Arts

### CORE COMPETENCIES

JavaScript (ES6)

React

Vue.js

HTML5
